

An Environmental Justice Climate Change Policy

Nicky Sheats, Esq., Ph.D.

*Director, Center for the Urban Environment,
John S. Watson Institute for Public Policy of
Thomas Edison State College and member of the
New Jersey Environmental Justice Alliance*

Environmental Justice:

concerned with the disproportionate burden of pollution inflicted upon communities Of Color and poor neighborhoods.

Impacts of Global Warming on Residents in Urban Areas:

- Increased number of deaths due to heat.
- Increased amount of air pollution.
- Detrimental impacts of extreme weather events that are not mitigated due to a lack of resources.

Environmental Justice Climate Change Policy:

- Emphasize strategies that reduce emissions of fine particulate matter and its gaseous precursors along with emissions of global warming gases.
- Ensure that reductions of emissions are fairly distributed.
- Use renewable energy sources and energy conservation extensively in urban areas.
- If carbon trading is utilized, carbon allowances should be sold annually and the resulting money used to support global warming initiatives in urban areas.
- Formulate climate change mitigation strategies specifically for people Of Color and poor people.
- Create an Environmental Justice Committee to oversee the environmental justice aspects of climate change policy in New Jersey.

The gaseous precursors of fine particulate matter are sulfur dioxide (SO₂) and nitrogen oxides (NO_x).

Environmental Justice Climate Change Policy Recommendation:

- **Emphasize strategies that reduce emissions of fine particulate matter and its gaseous precursors along with emissions of global warming gases.**

Fine particulate matter:

- Airborne solid or liquid particles that are less than 2.5 microns in diameter. Also known as PM2.5 or soot.

It Kills!!

- 50,000 deaths in the U.S. annually!!
- Disproportionately in cities.

The gaseous precursors of fine particulate matter are sulfur dioxide (SO₂) and nitrogen oxides (NO_x).

Environmental Justice Climate Change Policy Recommendation:

- **Ensure that reductions of emissions are fairly distributed.**

The Potential EJ Problem With Carbon Trading:

- **No reduction in EJ neighborhoods**
- **Fewer reductions**
- **Hot spots**

When emissions reduction goal is modest (how about acid rain program).

Environmental Justice Climate Change Policy Recommendation:

- Use renewable energy sources and energy conservation extensively in urban areas.

Vision For Our Urban Areas:

- **Cities become centers of innovation for renewable energy and energy conservation.**
- **Cities are redeveloped through use of renewable energy and energy conservation.**
- **High Schools and colleges linked to this effort.**
- **Jump start process by building Abbott Schools equipped with solar power and retrofitting urban churches.**
- **Basketball players and renewable energy experts.**

Environmental Justice Climate Change Policy Recommendation:

- **If carbon trading is utilized, carbon allowances should be sold annually and the resulting money used to support global warming initiatives in urban areas.**

A Unique Partnership:

**New Jersey Environmental Justice Alliance,
Center for the Urban Environment, Urban Mayors
Association, New Jersey Work Environment
Council, GreenFaith, Environmental Research
Foundation, New Jersey Environmental
Federation, Redefining Progress, Communities
For A Better Environment, Utilities.**

Environmental Justice Climate Change Policy Recommendation:

- **Formulate climate change mitigation strategies specifically for people Of Color and poor people.**

Think Katrina!!

- **University of Rhode Island project: gather information from people Of Color on disaster preparedness.**

Environmental Justice Climate Change Policy Recommendation:

- **Create an environmental justice committee to oversee the EJ aspects of climate change policy in New Jersey.**

California Committees:

- **Global Warming Legislation created an EJ Committee.**
- **NO_x trading program created one in response To Title VI administrative complaint.**

Final Thoughts:

- **Imperative that RGGI address equity issue.**
- **National EJ efforts**
- **American Association For The Advancement Of Science & Union of Concerned Scientists**
- **Color scheme**

END??
